

Merlinus Anglicus Junior:

OR, THE

STARRY MESSENGER,

For the YEAR of our Redemption, 1751.

Being the Third after

Bissextile, or Leap Year:

Wherein is contained,

- I. Astronomical, Astrological, and Meteorological Observations.
- II. The State of the Year deduced according to Arts from Solar Ingresses, Eclipses, various Configurations, Aspects and Conjunctions of the Seven Planets.
- III. The Rising, Southing, and Setting of the Moon, and High-Water at *London Bridge*.
- IV. Tables of the Rising, Southing, and Setting of the Seven Stars, and other Fixed Stars of Note: A perpetual Table of the Rising and Setting of the Sun, Beginning and Ending of Twilight, and Length of the Day and Night, to every fifth Day throughout the Year; with many other Tables pertinent for such a Work, all Accommodated to the Meridian of LONDON, whose Latitude is 51 Degrees, 32 Minutes North, but will serve for any Part of *Great-Britain* or *Ireland*. The like not Extant.

By HENRY COLEY, Student in the
Mathematicks and the Celestial Science.

I will behold the Heavens, even the Works of thy Fingers, the Moon and Stars which thou hast ordain'd Psal. viii.

LONDON: Printed by M. READ, for the
COMPANY of STATIONERS

A perpetual TABLE of Day-break, Twi- light, &c. in the Latitude of London.

From the various Configurations of the Planets in this Month, Variety of Matters may be produced; many Missives, Mails and Messengers are now dispatched to and from several Courts in Europe, in order to settle Affairs of considerable Importance. A great and mighty Scheme is now in Agitation to involve certain Nations in Europe into Confusion. A great Change is design'd in the Affairs and State of some foreign Nation; for a great Preparation is made about this Time.

Spain, Italy, Rome, Hungary, Arabia, &c. is threatened.

FEBRUARY hath XXVIII Days.

Last Quarter, the 7th Day, at 10 in the Afternoon.

New Moon, the 14th Day, at 11 at Night.

First Quarter, the 21st Day, at 3 in the Afternoon.

Full Moon, the 28th Day, at Midnight.

The Square of Saturn and Mercury shews at this Time in a particular Manner, that private and secret Villanies will be industriously spread abroad to the defaming of several worthy Persons in the Government, in lying News Papers and seditious Libels, and in a general Way, such vile Incendiaries are contriving to do all to the Injury of Mankind that is in their Power; but Venus in England's Ascendant, and Mars in his Exaltation in Trine to Jupiter, bodes Happiness and Felicity to the English Nation, and our Monarch in general.

A P R I L hath XXX Days:

Last Quarter, the 7th Day, at 9 at Night.
 New Moon, the 14th Day, at 5 in the After.
 First Quarter, the 21st Day, at 11 in the Morn.
 Full Moon, the 29th Day, at 10 in the Morn.

The various Applications of Mercury to Saturn, the Sun, Mars and Jupiter this Month, will make a compleat Discovery of what hath been in Agitation, and but in part laid open in the preceding Months, and now is the Time that we may expect to hear of some surprising and extraordinary Discoveries of several treacherous Designs, and chiefly of a religious Nature, that is to the Disturbance of true Religion and Piety; warm Disputes and Contest about Religious Ceremonies; the Spirit of Enthusiasm and Innovation is shamefully rampant.

M A Y hath XXXI Days.

M D		☾ rises and sets	Moon South	Lunar Aspects.						Astronomical Observations.
				☉	☿	♂	♀	♂	♀	
1	12	10 A 2	2 M 23	*	17		18			This will, in all Probability, be a very active Month in most Parts of the World. Most Nations in Europe and Asia appear uneasy, and in Con- federation, most public Affairs are at a Crisis, and Troubles and Distractions of many Countries are in great Ferment. In a Lunar Revolution expect various News from the North Parts of the World, of Insurrections and Conspiracy, treacherous and amazing Actions. Spain and Italy in odd Circumstances, Trouble and Confusion attend them, being possessed with Fears and Doubts of an approaching Event.

1	12	9A 28	2M 37			☐	18			16	11	We have this Month potent Mars in Amity with the Sun, that resplendent Lamp of Heaven. I have still good Hopes that our Kingdom of England continues in moderate, quiet, and flourishing Condition. And tho' this is a fit Time, and will be a very hot one for Action in some Places, yet I hope our Station is peaceable. But let us pray, that the good Angle of God preserve us from Sickness and contagious Diseases which may this Summer be justly feared amongst us, as well as in some other Parts of Europe <i>The sailing Clouds perhaps now pours On rugged Fields impetuous Showers.</i>

Astronomical Observations.

Many eminent and superlative Matters are now on the Anvil. Mercury, that nimble Messenger amongst the Stars, is very active this Month, affecting Saturn, Jupiter, and Venus no less than five Times: He is the Author of quick and hasty Proceedings. Many private Embassies dispatched from one Country to another. Great Controversies about Affairs of State, Laws, Customs, and Privileges, to the Alteration of Religion, and religious Ceremonies. The Seditious is very active in sowing such Seed.

France is now greatly embarrassed in their Expectations and Designs.

September hath XXX Days.

Last Quarter the 1st day, at 10 in the morning.

New Moon the 8th day, at 3 in the afternoon.

First Quarter the 16th day, at 5 in the afternoon.

Full Moon the 24th day, at 2 in the morning.

Last Quarter the 30th day, at 6 in the evening.

		and fers		South		☉	☿	♊	♋	♌	♍	
1	C	10	13	5	M 40	22	4	8	☐		13	This Month's Configuration will doubtless Shew, there's no Person or Place that is free from Aspersions. Busy Spirits will now be very active, Calumniation and Impeachments are promoted against Men in Authority; many brisk and warm Disputes are now forwarded, likewise many malicious Reports fomented to the Dishonour and Abuse of some noble and worthy Patriots of this Nation: But it is to be hoped the Trine of the Sun and Jupiter will happily contribute to healing of many Breaches, and much abate the Fury of these censorious Times.

New Style

Venus and Mercury are in Conjunction with the Sun, and will scarcely be seen this Month; Jupiter is Oriental, and rise at 6 at Night; Mars and Saturn are both Occidental and Evening Stars; Saturn sets at 6 at Night, and Mars about 3 in the Morning.

M M		Rises	Moon		Lunar Aspects.						Astronomical Observations.	
D	D	and set.	South	South	☉	☿	♈	♊	♋	♌		
1	12	11 A	52	6 M	36	6	Δ	*	2	2	13	Many Fears and Jealousies are now raised in the Minds of People, and a discontented Spirit of Faction appears. Jupiter and Venus, also Mercury, are now retrograde; Jupiter by this Motion makes a second Opposition of Saturn, which aptly denotes the deplorable State of some foreign Countries, and the retrograde Torture which their Affairs is now in. Strong preposterous and unnatural Actions and Designs amongst Men, an unsettled Condition in Affairs both in Church and State.

						☉	☿	♄	♃	♊	♋	
1	12			1 M 28	7 50	*	15	7	8		2	The Sign Sagittary is possessed with the Sun, Saturn, and Mercury, all in Conjunction, and in Opposition to bright Jove in Gemini. Here is a Storm impending, and heavy will it be upon those Nations or People on whom it doth fall. Much Contention and Divisions, Troubles and Calamities, break out frequently upon the malefick Conjunctions and Oppositions of the Superiors. May Heaven avert these fiery Atoms from these Kingdoms: And happy would it be, if we observe really as we ought to love God and one another, as the Gospel Commandments direct.

A TABLE of some principal fix'd Stars, with the Time they rise, south, and set, either before or after the seven Stars; as also their Colour, Magnitude, and meridian Altitude, by which they may be readily discover'd.

Co- lour.	Mag.	Alt.	Names of the Stars	Rise.		South.		Sets.	
				H.	M.	H.	M.	H.	M.
♂	1	53	<i>Aldebaran, or Bull's Eye</i>	1	a 34	0	a 48	0	b 0
h ♀	1	29	<i>Left Foot of Orion</i>	4	31	1	31	1	34
♀ h	2	36	<i>Middle * in Orion's Belt</i>	4	13	1	51	0	35
♂ ♀	1	45	<i>Right Shoulder of Orion</i>	3	23	2	8	0	8
♀ ♂	1	21	<i>Sirius, the great Dog</i>	6	51	3	1	0	48
♂	2	43	<i>Procyon, the little Dog</i>	5	33	3	53	2	a 7
♂ ♀	1	30	<i>Heart of Hydra</i>	8	39	5	41	2	44
h ♂	1	51	<i>Regulus, Lion's Heart</i>	7	26	6	21	5	16
♀	1	54	<i>Deneb, the Lion's Tail</i>	8	42	7	54	7	7
♀ ♂	1	28	<i>Virgin's Spike</i>	12	46	9	38	6	36
♂ ♀	1	58	<i>Arcturus</i>	10	47	10	30	10	12
♂	1	12	<i>Antares, Scorpion's Heart</i>	17	36	12	39	7	42
h ♀	2	46	<i>Bright Star of the Vulture</i>	17	38	16	3	9	b 27
♀ ♀	1	6	<i>Fomabant</i>	1	14	19	11	10	37
h ♀	2	65	<i>Head of Andromeda</i>	19	43	20	19	2	56

THE brightest of the seven Stars is of the third Magnitude, and hath 61 Degrees of meridian Altitude, and in Colour participates of the *Moon* and *Mercury*.

2. The fix'd Stars all rise, south, and set about four Minutes sooner every Night, than they did the Night before. This consider'd, the exact Time of their rising, southing, and setting, for any intermediate Night, not herein noted, may be very easily deduced from this Table, by Inspection only.

To know the Time of the rising, southing, and setting of any Star in this Table, for any Day requir'd, it is but considering how many Hours and Minutes that Star rises, souths, or sets, either before or after the seven Stars, on that Day, and you shall have your Desire; observing, that in this Table *a* stands for *after*, and *b* for *before*.

A CHRONOLOG Y, 1751.

An. Dom.		Yrs. since.
1066	<i>W</i> illiam Duke of Normandy conquers England	685
1330	The <i>Canaries</i> discovered by an <i>English</i> Ship	421

Coley, 1751.

1. *The Earth trembled and quaked, the very Foundations of the Hills also shook, and were removed because he was wroth.* Psalm 18. ver. 7.

AMONG the several Plagues and Judgments that the Almighty God is pleased to visit and punish Mankind with, for their enormous Sins and Disobedience, that of EARTHQUAKES may be accounted the most dreadful and tremendous, which in the Twinkling of an Eye swalloweth up thousands of People of all Qualities, Ages and Sexes; with the most magnificent and stately Edifices that Pride, Ambition, and the Power of Man can raise. How astonishing (saith a learned Divine) are the fearful Effects which Earthquakes have produced in all Ages? As we may find in Histories and Philosophical Discourses. In all, we may read of Rocks torn in Pieces; Mountains not only cast down, but removed; Hills raised, not only out of Vallies, but out of Seas; Fires breaking out of Waters; Stones and Cinders belched up; Rivers changed; Seas dislodg'd; Earth opening; Cities and Towns swallow'd up; and many other such hideous Events: And all to convince sinful Man of the Greatness and Power of the supream Creator, and how vain it is to value themselves upon any mundane Enjoyments.

Fear chills our Hearts; what Heart can fear dissemble,
When Steeples stagger, and huge Mountains tremble.

A late very astonishing Instance we had at *London*, and Parts adjacent. But before I proceed to give a Relation of some Instances of this Kind, it is necessary to shew the Physical Causes of these dreadful Concussions of the Earth: As is assign'd by Philosophers.

1. Earthquakes are of three kinds: Inclination; Pulsation; and Tremulous. When the Earth vibrates from right to left, it is accounted of the first kind; when the Earth beats up and down like an Artery, of the second; and when the Earth shakes and quivers every way like a Flame, it is of the last; which was our late Instance at *London*.

2. With respect to the natural Cause of these dreadful Phenomena's, the Basis and true Hypothesis is; the Earth is replete with sulphureous and nitreous Veins, and full of subterraneous Caverns, Clefts and Receptacles, which are filled, some with Water, others with Air and inflammable Exhalations.

ons: These being rarified and kindled by the subterraneous Fires, force their Way through hard Bodies with Eruption and Exploſion, like a Mine ſprang with Gunpowder; cleaving the Earth for Vent: Whence Subverſion of Hills and Towns do follow. If the Matter kindled be ſmall, and the Earth very porous, it preſſes forward with great Rapidity like a continued Train of Gunpowder, ſhaking all the adjacent Parts with a tremulous Motion, for ſome Hundreds of Miles. As that in *Peru*, that ran from South to North, 900 Miles; and in 1601 an Earthquake reached from *Aſia*, to the *French* Shores, ſhaking *Italy*, *Hungary*, *Germany*, and all *France*. Thoſe that would ſee a copious Account of the Species of Earthquakes, may have recourſe to *Pliny*, *Seneca*, *Poſſidonius*, *Fromondus* and others, but for later and more curious Accounts, See *Pbil. Tranſ.* N°. 151, 157.

Now I have ſhewed the efficient, material and formal Cauſes of an Earthquake to be Natural; yet the primary and infallible Cauſe is from God. And the Final, is the Signification of an angry God, moved by the execrable Crimes of a wicked People, according to that of the Prophet *Jeremiah*, Chap. x. ver. 10. At his Wrath the Earth ſhall tremble, and the Nations ſhall not be able to abide his Indignation. And it is very apparent that many have been ſupernatural, and cauſed by the immediate Hand of God, of which we find ſeveral Inſtances in Holy Scripture, that we might dread and tremble before the Almighty, who needs neither Vapours nor Exhalations to execute his Vengeance upon incorrigible Sinners.

The firſt of this Kind that we read of, was at the Promulgation of the Law at Mount *Sinai*, *Exodus* xix. and ſo on.

Another is recorded, *Numbers* xvi. when *Korah*, *Dathan*, *Abiram*, &c. aſſembled together againſt *Moses* and *Aaron*.

A third was when the *Iſraelites* gained a compleat Victory over the *Philifſines*, as in *Samuel* I. xiv.

A fourth and terrible one, was in the Days of *Uzziah*, King of *Judah*. See *Chronicles* II. xxvi. This is likewise mentioned by the Prophets *Amos* and *Zechariah*, Chap. xiv.

The next that is recorded, was at the Death of our bleſſed Lord and Saviour, and was an infallible Demonſtration of his Deity, and that he was truly the Son of God, as we find in *St. Matthew*, Chap. xxvii.

We likewise read of another ſupernatural one, at the Reſurrection of Chriſt, *Matthew* xxviii. A. M. 4036.

I aſſy,

Coley, 1751.

Lastly, we read of two in the *Acts of the Apostles*, Chap. iv. ver. 31. The second in Chap. xvii. These are all the Earthquakes I find mentioned in Holy Scripture to have actually happened, but there are others spoken of, which may be termed Metaphorical Earthquakes, and may signify great Alterations and Mutations in divers States and Kingdoms of the World; wherein, by the shaking, moving, removing, breaking down and dissolving the Earth, we may understand the Inhabitants of the Earth, and the Punishments that God would inflict upon them for their repeated Sins and Provocations. Such as these we find *Isaiah* threatening the Nation of the *Jews* with, in Chap. xxiv. of his *Prophecy*, as likewise in the xxixth. And our blessed Saviour foretells the Destruction of the Temple, and what great Earthquakes shall be before it, and the Signs of his coming to Judgment, *Matthew* xxiv. (which read.) Such Metaphorical Earthquakes are thought to be those that are prophesied of in the *Revelations*, as in Chap. vi. viii. xi. and xvi. vide.

Having given a small Account of the Supernatural and Metaphorical Earthquakes recorded in Holy Writ, I shall now relate from the best Chronologers, in order, some remarkable and wonderful Earthquakes, and the Consequents and Catastrophes that succeeded them.

Plato, in his *Timæus*, mentions a wonderful Earthquake about 600 Years before our Saviour. There was in old Time, without the Straits of *Gibraltar*, a vast Island, bigger than *Asia* and *Africa* together, called *Atlantis*, which was overwhelmed and drowned in the Sea in one Night's time, so that no Ship could sail there for a long Time.

Pliny writes of twelve Cities ruined in one Night. And *St. Augustine* is quoted for what is more strange, that in a terrible Earthquake, an hundred Cities in *Libia* were destroyed also.

In the fifth Year of *Tiberius*, Emperor of *Rome*, thirteen Cities in *Asia* were destroyed in one Night by an Earthquake. And these famous Cities of *Achaia*, (viz.) *Helice* and *Buris*, (which *Ovid* in the fifteenth Book of his *Metamorph.* writes of) suffered the like Fate by an Earthquake.

I shall leave off the Prosecution of this History in the fifteenth Year of our blessed Saviour, for want of Room, and for another Opportunity; and so conclude with three memorable Instances, and nearer our Days. That is, in the Year 1692.
the

Coley, 1751.

the seventh of *June*, at eleven in the Morning, *Port-Royal* in *Jamaica*, the fairest Town of all the *English* Plantations in *America*, and the best Emporium and Mart in that Part of the World; was, by an Earthquake, shaken and shattered to Pieces, and sunk into and covered, for the greatest Part, by the Sea: And by the sinking of the Earth, and the Eruption of the Sea, 1500 Persons were destroyed, and other considerable Ruin and Devastations happened thereby in many other Parts of the Island.

Likewise another remarkable Earthquake was felt at *London*, and Parts adjacent; as *Essex*, *Kent*, *Suffex*, *Surrey*, *Hampshire*, and many Parts of this Kingdom; to the great Consternation of many People: It also shook most Parts of the *Dutch* and *Spanish* Netherlands, also *Germany* and some Parts of *France*, for above 260 Miles square. This happened September 8, 1692.

The next and last I shall relate, is that most astonishing and tremendous Earthquake that happened upon *January* 7, 1692-3, in *Sicily*, (an Island belonging to the King of *Spain*) when *Mount Aetna* began to roar in a most horrible Manner, which usually presages some dismal Calamity to ensue. For on the 11th the ancient and famous Cities, *Catania*, *Siracusa*, *Augusta*, *Recusa*, *Messina*, and no less than 37 Cities, Towns and large Villages, were quite overthrown and destroyed, and 130,000 People perished; for from the 9th to the 20th Day were no less than 14 distinct Earthquakes.

I shall close all with some Reflections and Observations. Blessed be God, he did but only cause the Earth to tremble with us, in this late Visitation (*viz.* Feb. 1750) and gave us but a gentle Shock, without doing us any great Harm. Let us be thankful therefore unto him for his great Mercy towards us, lest this Earthquake return again upon us. Let us humble ourselves before the Lord, and reform our Lives and Conversations, and seek the Lord whilst he may be found, lest he suddenly appear in Wrath against us. For assuredly, an Earthquake is a Warning from Almighty God, of some great and superlative Changes and Calamities to ensue. Our blessed Saviour tells us, in the xxivth Chapter of *St. Matthew's Gospel*, that near unto the End of the World, there shall be Earthquakes in divers Places, and that they are the Beginning of Sorrows; but if we obey the Voice of the Lord in time, we shall be prepared for whatever Changes may come.

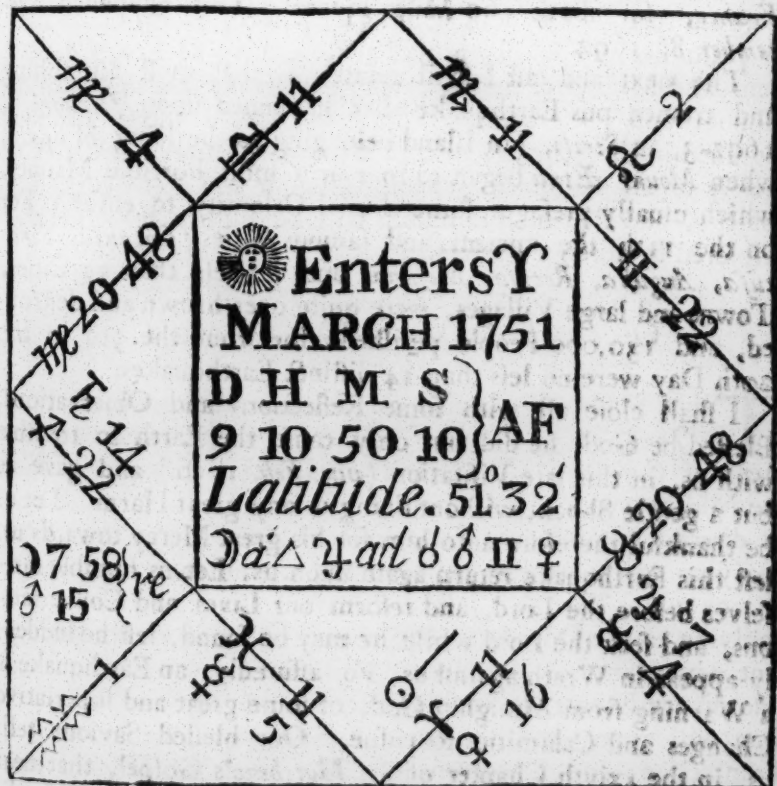

II. Observations

Coley, 1751.

II. Observations upon the Influences of the Planets,
at the Times of the Sun's apparent Ingress into
the equinoctial and tropical Signs, for the present
Year of our Lord, 1751.

Of the SPRING QUARTER.

THIS Quarter begins on *Saturday* the 9th Day of *March*,
at 50 Min. 10 Sec. past 10 at Night, and the Position
of the Planets in the Heavens, is represented in the following
Scheme, set to the time of the Ingress.

We find in this ingression Scheme, that 11 Degrees of
Virgo culminate, and 21 Degrees of *Scorpio* ascend. Mars
Lord of the Ascendant in the Second with the Moon, and in
Trine

Coley, 1751.

Trine to *Jupiter* in the sixth, and in Square to *Venus* in the fifth. At the Preventional full Moon, the Angles are the same Signs, the Planets all in the same House, the Moon excepted, who is there on the Cusp of the Tenth, separating from the ☉, and applying to ☿ ♀ and ☐ ♂; in this she separates from the △ ♀, applies to ☿ ♂ ☐ ♀. These Positions do in general declare secret and treacherous Dealings in the World; the Spirit of Fraud and Hypocrisy will be predominant, and animate Mankind to entrap and betray one another, to the Ruin and Destruction of many. The Square of *Mars* and *Venus* denote that Pride, Leachery and Licentiousness will be let loose among us, to the great Mortification of our Laws, both Civil and Ecclesiastical. All the Planets direct and *sub terra* in both Figures, intimate to us Mortals, that many close and private Councils will be employed, from which many Jealousies and Suspicions will arise, causing Malice, Contentions and Misunderstandings, whereby many are degraded of Honour and Preferment. The Planet *Mars* most essential, dignified in the Scheme, and in Trine to *Jupiter*; bodes Prosperity to this Nation in general, Honour and Renown to his Majesty, and that his Friendship will be highly solicited and implored by foreign Powers.

Of the SUMMER QUARTER.

THIS Quarter begins on Monday the 10th Day of June, at 43 Minutes past 9 at Night, when 24 Degrees of *Capricorn* ascend, and 28 Degrees of *Scorpio* possess the Mid-heaven. The Moon is in 9 Degrees of *Gemini*, and in direct Opposition to *Saturn*, Retrograde in the 10th, and applying to the Square of *Mars* and Conjunction of *Mercury*, Retrograde. *Jupiter* is just now leaving the Sign *Taurus*, and applying to the Opposition of *Saturn*. This is a very unpleasant Appearance of the Heavens. There seems to be some extraordinary Events approaching this Summer Quarter. Now or soon will appear to the World some remarkable Stratagems, Transactions and Occurrences. The Seeds of Discord that were sown in the Spring begin to appear Publick; for this Opposition being the grand Aspect of the superior Planets, cannot but denunciate mundane Actions equivalent, as *Legum & imperiorum mutationes, naturæq; miracula*, yea, even

Coley, 1751.

even the Change of Laws, Customs and Privileges of Empires and Kingdoms, and even also surprizing Miracles of Nature. These Configurations are usually attended with Inundations, Thunders, Meteors, Earthquakes and Calamities of divers Species: This Opposition, I fear, bodes no Good to the Twin City; the Lord preserve it from pestilential Sicknefs, &c.

Of the AUTUMNAL QUARTER.

THIS Quarter begins on *Thursday* the 12th Day of *September*, at 49 Minutes before Noon, when 24 Degrees of *Scorpio* ascends, and the 16th Degree of *Virgo* Transit the Mid-heaven: The Moon is in 14 Degrees of *Scorpio*, in the 12th departing from the Body of *Venus* and applying to the Trine of *Mars*. The Premises at first considered, one might expect a Calm, and hopeful Proceedings in Councils and Treaties, being carried on with more Amity and Alacrity; but alas! this Calm that seems in *Europe* now to appear, is such a one as is frequently observed to precede great and surprizing Storms; for at the time of this Ingress the three Superiors are Angular, and in violent Configurations, *Saturn* and *Jupiter* in Opposition from the first and seventh, and *Mars* squares them both from the Angle of the Earth. This signifies the involving some Nations and States in great Troubles and Calamities. These Positions do much participate in Nature and Quality with those at the preceding Ingress, and seems to carry on the Affairs abroad with great Violence and Fury, to the bringing about some considerable Change and Catastrophe to several Nations in *Europe*.

Of the WINTER QUARTER.

THIS Quarter begins on *Tuesday* the 11th Day of *December*, at 36 Minutes past four in the Morning, when 6 Degrees of *Leo* culminates, and 27 Degrees of *Libra* ascends; the Moon is in 17 Degrees of *Aquarius*, departing from the Square of *Venus*, and applying to the Sextile of *Saturn*; and all the Planets under the Earth except *Jupiter*, who is Retrograde in the eighth, and in Sextile to *Mars* in the sixth. The Aspects and Positions at the time of this Ingress, is of a
more

Coley, 1751.

more salubrious Nature than at the two preceding ingressional Figures. *Mars* in *Aries*, in Sextile to *Jupiter*, promise Success to our national Affairs, with Prosperity to Trade, and an harmonious Agreement amongst our Superiors. But we must not expect, that the Heats and Passions of Mankind will as yet, totally subside; for the ☿ of ♀ and ♃ have not done half their Errand.

III. Of the Eclipses this Year, 1751.

FOUR Eclipses this Year, and but two of them visible in *England*, and they both of the Moon.

The First is of the Sun invisible, *May* 14, at one o'Clock in the Morning.

The second is of the Moon visible, according to this Calculation, *May* 29.

		H.	M.	
The Beginning	—	0	7	} in the Morning
The Middle	—	1	47	
Ecliptick ☿	—	1	53	
The End	—	3	27	
The whole Duration	—	3	20	
Digits Eclipsed	—	10°	27'	

The third is invisible of the Sun, *Nov.* 7, at one in the Morning.

The fourth and last is of the Moon visible, according to the following Calculation.

		H.	M.	
<i>November</i> 21,				
The Beginning	—	8	16	} at Night.
The Middle	—	9	40	
Ecliptick Opposition	—	9	46	
End	—	11	4	
Whole Duration	—	2	48	
Digits Eclipsed	—	8	39	

F I N I S.
